TITLE OF COURSE: CITIES

JPF 455Y / JPF 2430Y

OBJECTIVES OF THE COURSE

As we have just entered a period when for the first time in our history, half of the population on this planet is urban, the significance of improving our understanding of cities in a global context has never been greater. This course is designed to improve awareness of cities as approached by different disciplines and in different international contexts. The course will introduce theoretical frameworks for understanding city development and then move to the key issues and challenges confronting cities globally. The role of cities as new sites of governance in a global context will be examined through the lens of these core challenges. More generally, the course will explore cities and global change; cities and urban design; utopian cities; cities and social justice; cities and security; cities and climate change; state reform and city politics; cities and citizenship; cities and immigration; cities and economic development; cities and governance; and, cities and the political-economy of urban space.

By bringing together leading faculty members on campus and experts in the field who focus on cities in their work, be it within Political Science, Philosophy, Literature, Planning, Urban Design, Architecture, Environment and Health, Geography or Social Work, the course will explore, through different disciplinary perspectives, just how the study of cities is evolving for a renewed understanding of the subject, for research and for teaching at the University of Toronto.

The course design is undertaken also in recognition of the importance of bringing together area studies, where the study of cities of Latin America, Asia and Africa, are brought together in comparative context with the study of cities of Europe and North America.

STRUCTURE OF THE COURSE

The course will be offered as a combined fourth year and graduate level course. This offering has been selected in order to accommodate senior undergraduate and graduate students from different departments like Political Science, History, Literature, Geography, Sociology, and Economics as well as students from specific programmes like the design programmes of the Daniels Faculty of Architecture, and the Innis Undergraduate Urban Studies Program.

The course will be structured as a mixed format—offering students lectures, power-point presentations, city photographs and images, data tables, web-links to international agencies and related reports. Case Studies will be appended to a number of units as illustrations of lecture material.

As a cross-disciplinary course, the aim will be to improve understanding of different disciplinary approaches to the study of cities and consider common veins which run through these approaches and require improved understanding, deeper investigation, and future collaborative work. While disciplinary focus will propel the course, the intent is to bridge traditional disciplinary divides which have tended to obscure significant discourse on cities. This will be achieved in part again by course design wherein panel discussions, guest instructors leading seminar discussions and faculty panels will help us to identify and address inter-disciplinary links, divides and areas of resonance in the urban field.

The course will also involve invited guests, urban specialists and practitioners from outside the university to help bridge students and faculty to the broader academic and city community. By mixing formats which include for example lectures, panel discussions, and student only seminars (for discussion and debate on readings and arguments posed by lectures and panelists), the course will allow for movement in our ideas which govern the study of cities.

The course will be organized according to 24 units, each with core and optional reading lists; discussion questions for consideration; and periodic assignments. The units are structured according to five parts to the course, detailed as follows:

UNITS	PART ONE: INTRODUCTION
1 Sept 15	COURSE INTRODUCTION
2 Sept 22	COURSE OVERVIEW: AN INTERDISCIPLINARY APPROACH TO CITIES
PART TWO: CONCEPTUALIZING CITIES	
3 Sept 29	CONCEPTUALIZING CITIES IN A GLOBAL CONTEXT
4 Oct 6	CITIES IN DESIGN: THE ART OF BUILDING CITIES
5 Oct 13	CITIES IN PHILOSOPHY
6 Oct 20	DESIGN AND CONTEMPORARY URBANISM
7 Oct 27	THE GOOD CITY
8 Nov 3	FRAMEWORKS FOR DEFINING GLOBAL CITIES
PART THREE: THE CORE ISSUES AND CHALLENGES FACING CITIES GLOBALLY	
9 Nov 10	CASE PRESENTATION - PLACES TO GROW
10 Nov 17	PLANNING CITIES IN INTERNATIONAL CONTEXT
11 Nov 24	SUSTAINABLE CITIES: GLOBAL AND LOCAL ENVIRONMENTAL CHALLENGES CASE PRESENTATION - CITIES & CLIMATE CHANGE
12 Dec 1	CASE PRESENTATION - TRANSPORT PLANNING
13 Jan 12	GENTRIFICATION AND DIVERSITY: TORONTO
14 Jan 19	CITIES AND CITIZENSHIP
15 Jan 26	CASE PRESENTATION - PLANNING CHINA'S MEGACITIES
16 Feb 2	PROPERTY MARKETS – PRIVATE SECTOR DEVELOPMENT & PUBLIC POLICY

17	Feb 9	CITIES AND POVERTY: HOUSING, BASIC SERVICES AND INFRASTRUCTURE INVESTMENT
PART FOUR: INTER-DISCIPLINARY ROUNDTABLE – STUDENTS AND FACULTY – NEW TEACHING AND RESEARCH FRONTIERS		
18	Feb 16	THINKING ABOUT CITIES IN A GLOBAL CONTEXT – NEW TEACHING AND RESEARCH FRONTIERS
	Feb 20-24	Reading Week
PART FIVE: PATHS FORWARD – SUSTAINABILITY, GOVERNANCE, PLURALISM		
19	Mar 1	THE CITY AND SENSATION
20	Mar 8	PLURALISM AND THE FORM OF THE CITY
21	Mar 15	THEORIZING SUSTAINABILITY
22	Mar 22	AGAINST JAMESON – FRAMING A POLEMIC IN ARCHITECTURAL AND URBAN THEORY
23	Mar 29	CASE PRESENTATION – CITIES IN FEDERALISM IN CANADA
24	April 5	21 st CENTURY URBANISM: SUSTAINABILITY AND GOVERNANCE

EVALUATION AND MARKS BREAKDOWN

In-Class Discussion 20% of total grade

Contributions to the weekly discussions will be worth 20% of the grade (10% per term - Total 20%).

Periodic weekly assignments 60% of total grade

For a number of units (6 in total), each student is expected to work through and submit a one-page assignment to be submitted in class on the same day that topic is indicated. Assignments should be typed using 12-point font, Times New Roman and one-inch margins (2 pages double spaced or one page single spaced). Page length does not include title page, graphs, tables, charts, endnotes or bibliography. Assignment questions for these particular units are provided in the reading list attached. Each assignment will be graded out of ten points and converted into a grade for a total of 60%.

Deadlines: Students must submit each assignment in class each week as indicated and on the day when that topic is offered. Since these assignments are the basis for in-class discussion students cannot receive an extension without penalty. The late penalty is 5% per day for one week. No papers will be accepted after one week. This penalty commences at the end of class each week.

Final Assignment 20% of total grade

UNIT # 18 on February 16th before Reading Week, will be conducted as a roundtable on new research frontiers. This unit will assist students in the final essay assignment. This Final Assignment is due in class on the last day (April 5th) and students will discuss their ideas in class as part of the roundtable with

the three instructors. Questions to guide the discussion and preparation of this assignment are provided on the reading list in the final unit below (April 5th). This assignment will be limited to 2000 words. A penalty of 2% per day will be enforced for any late papers.
