TITLE OF COURSE: CITIES

JPF 455Y / JPF 2430Y

OBJECTIVES OF THE COURSE

As we have just entered a period when for the first time in our history, half of the population on this planet is urban, the significance of improving our understanding of cities in a global context has never been greater. This course is designed to improve awareness of cities as approached by different disciplines and in different international contexts. The course will introduce theoretical frameworks for understanding city development and then move to the key issues and challenges confronting cities globally. The role of cities as new sites of governance in a global context will be examined through the lens of these core challenges. More generally, the course will explore cities and global change; cities and urban design; utopian cities; cities and social justice; cities and climate change; cities and poverty; state reform and city politics; cities and citizenship; cities and immigration; cities and economic development; cities and governance; and, cities and the political-economy of urban space.

By bringing together leading faculty members on campus and experts in the field who focus on cities in their work, be it within Political Science, Philosophy, Literature, Planning, Urban Design, Architecture, Environment and Health, Geography or Social Work, the course will explore, through different disciplinary perspectives, just how the study of cities is evolving for a renewed understanding of the subject, for research and for teaching at the University of Toronto.

The course design is undertaken also in recognition of the importance of bringing together area studies, where the study of cities of Latin America, Asia and Africa, are brought together in comparative context with the study of cities of Europe and North America.

STRUCTURE OF THE COURSE

The course will be offered as a combined fourth year and graduate level course. This offering has been selected in order to accommodate senior undergraduate and graduate students from different departments like Political Science, History, Literature, Geography, Sociology, and Economics as well as students from specific programmes like the design programmes of the Daniels Faculty of Architecture, and the Innis Undergraduate Urban Studies Program.

The course will be structured as a mixed format—offering students lectures, power-point presentations, city photographs and images, data tables, web-links to

international agencies and related reports. Case Studies will be appended to a number of units as illustrations of lecture material.

As a cross-disciplinary course, the aim will be to improve understanding of different disciplinary approaches to the study of cities and consider common veins which run through these approaches and require improved understanding, deeper investigation, and future collaborative work. While disciplinary focus will propel the course, the intent is to bridge traditional disciplinary divides which have tended to obscure significant discourse on cities. This will be achieved in part again by course design wherein panel discussions, guest instructors leading seminar discussions and faculty panels will help us to identify and address inter-disciplinary links, divides and areas of resonance in the urban field.

The course will also involve invited guests, urban specialists and practitioners from outside the university to help bridge students and faculty to the broader academic and city community. By mixing formats which include for example lectures, panel discussions, and student only seminars (for discussion and debate on readings and arguments posed by lectures and panellists), the course will allow for movement in our ideas which govern the study of cities.

The course will be organized according to units, each with core and optional reading lists; discussion questions for consideration; and periodic assignments. The units are structured according to five parts to the course, detailed as follows:

SUMMARY OF COURSE SCHEDULE

UNITS	TOPICS
PART 1: INTRODUCTION	
1. Sep17, 2015	Overview: An Interdisciplinary Approach to Cities
PART 2: CONCEPTUALIZING CITIES	
2. Sep 24	Conceptualizing Cities in A Global Context
3. Oct 1	Early Theories of Urban Politics in North America: Elitists vs Pluralists
4. Oct 8	City Design Before World War II
5. Oct 15	Frameworks for Defining Global Cities
6. Oct 22	City Design After World War II
7. Oct 29	Regimes, Governance, Multilevel Governance and Leadership
PART 3: THE CORE ISSUES AND CHALLENGES FACING CITIES GLOBALLY	
8. Nov 5	Neighbourhood Change in Toronto since 1970: Inequality and the Growing Socio-spatial Divide
9. Nov 12	Canadian City Managers: Leadership in the Shadows
10. Nov 19	Transport Planning
11. Nov 26	Cities and Climate Change & Metabolism of Mega Cities
12. Dec 3	LAST CLASS – Term 1 Roundtable
13. Jan 7, 2016	Decentralization and Local Democracy
14. Jan 14	Places to Grow
15. Jan 21	Property Markets – Private Sector Development and Public Policy
16. Jan 28	Cities and Poverty: Housing, Basic Services, and Infrastructure Investment
17. Feb 4	Pluralism and the Form of the City
18. Feb 11	“Thoughts on Urban Form and Architecture in Japan”
Feb 16-19	READING WEEK
PART 4: INTER-DISCIPLINARY ROUNDTABLE – STUDENTS AND FACULTY – NEW TEACHING AND RESEARCH FRONTIERS	
19. Feb 25	Thinking About Cities in a Global Context – New Teaching and Research Frontiers - <i>Student presentations</i>
20. Mar 3	Thinking About Cities in a Global Context – New Teaching and Research Frontiers - <i>Student presentations</i>
21. Mar 10	Thinking About Cities in a Global Context – New Teaching and Research Frontiers - <i>Student presentations</i>
PART 5: PATHS FORWARD	
22. Mar 17	Cities in Federalism in Canada
23. Mar 24	The Cities Agenda – 2015-2030
24. Mar 31	Final Roundtable

EVALUATION AND MARKS BREAKDOWN

IN-CLASS DISCUSSION 20% OF TOTAL GRADE

Contributions to the weekly discussions will be worth 20% of the grade (10% per term - Total 20%).

PERIODIC ASSIGNMENTS 60% OF TOTAL GRADE

For a number of units (6 in total), each student is expected to work through and submit a one-page assignment. The assignment must be submitted both in hard copy and by email on the day that topic is indicated. Assignments should be typed using 12-point font, Times New Roman and one-inch margins (2 pages double spaced or one page single spaced). Page length does not include title page, graphs, tables, charts, endnotes or bibliography. Assignment questions for these particular units are provided in the reading list attached. Each assignment will be graded out of ten points and converted into a grade for a total of 60%.

Deadlines: Students must submit a hard copy of each of the six periodic assignments at the beginning of the class on the date it is due. Students must also email a copy of their assignment (in Word) by no later than 9:30am before class. The assignment should be emailed to: patricia.mccarney@utoronto.ca

Since these assignments are the basis for in-class discussion students cannot receive an extension without penalty. The late penalty is 5% per day for one week. No papers will be accepted after one week. This penalty commences at the end of class after 11:30am.

FINAL ASSIGNMENT 20% OF TOTAL GRADE – Due March 24th

UNITS #19, 20 and 21 (on February 25th and March 3rd and March 10th), will be conducted as roundtables on new research frontiers. These Units, with scheduled class presentations, will assist students in the **final assignment due in class on March 24th 2016**.

This assignment is not a traditional research essay but is a research proposal. This assignment should address the following **four components**:

1. What do you consider to be the single most pressing research issue on cities in the next decade?
2. Provide solid rationale as to why you believe this to be the priority issue

3. How would you frame a research agenda to address this priority issue for cities in a global context? Draft three research questions (one primary and two secondary research questions) to guide this new research agenda.
4. Create an annotated bibliography of four core references (not from this reading list) that help to frame and inform this research agenda.

Students will discuss their ideas in class as part of the roundtables with the three instructors. Students should come to the roundtable prepared to present their preliminary research proposal outlining the four components listed above. This assignment will be limited to 2000 words. A penalty of 2% per day will be enforced for any late papers.
