Course Description

The purpose of this course is to immerse students in environmental policy literature in a Canadian context. Two current - and critical - events will occur in the fall of 2015: a federal election (scheduled October 19th) in Canada and the UN Climate Summit (Nov. 30 – Dec. 11). We will spend the duration of the semester focused on these two events. For the first part of the course, leading up to the federal election, we will examine the role of political parties, the media, and the Prime Minister's Office in environmental policy. Following the election, we will turn our attention to climate change and focus on Canada's approach to the UN Climate Summit. These two events will shape Canadian environmental policy in the next decade. We will closely follow these events in Canadian and international newspapers. At the same time, we will read scholarly manuscripts and think critically about how environmental policy is made inside Canada's federal system. We will also read Naomi Klein's most recent book on climate change. While Klein is not traditionally understood as an "academic," she is an iconic Canadian public intellectual. A critical examination of her book will open discussion to Canada's understanding of itself in global politics.
