**Course Outline**

This course will explore the dynamics of political change in post-Mao China through an examination of selected systemic challenges and regime responses. The primary focus will be on processes of institutional development and decay as the Party-State regime alternates between hard and soft authoritarianism. A secondary theme will deal with evolving state-society relations, exploring the regime’s efforts to manage an increasingly diverse and restive society. An important goal of the course will be to introduce students to the major scholarly debates within the contemporary China studies field, as well as to the primary and secondary materials available for empirical research on these questions.
