POL 304H1-F: Using Data to Understand Politics and Society  
FALL 2021

PREREQUISITES: POL232H1/POL242Y1/POL322H1/equivalent

Lecture: Monday, 6—8 pm, SS 561  
Instructor: Professor Olga Chyzh, olga.chyzh@utoronto.ca  
Office Hours: by appointment, https://chyzh.youcanbook.me/

Overview and Objectives

Students will learn about role of data for understanding politics and society, and a wide range of approaches to analyzing such data. How do information and data shape politics and policies? What insights can we gain about contemporary and past societies from the data they produce? To answer these questions we will examine a series of methodological approaches to different types of political data, including text analysis, network analysis, spatial statistics, and time-series analysis. This course will draw from topics in the study of international relations, economics, political behavior, and statistics to offer a diverse set of tools for processing and analyzing different types of data. Applications will include war and conflict, terrorism, international trade, social media, elections, and representation.

Learning Outcomes

This course is designed as a series of weekly modules that loosely build upon each other. Each module covers one or more state-of-the-art approaches to statistical data analysis. For each topic covered, the objectives are that students will:

- Learn the general mechanics of the specific method;
- Formulate theories and derive hypotheses testable using this method;
- Apply the method to extract/analyze real-world political and social data.

Course Materials

Materials for the course, including course videos, are posted on Quercus. Please allow time for processing videos.

Software

R (latest version) https://www.r-project.org/  
Reading

Please complete all assigned readings prior to class.

Coding Sessions

For each method covered we will run through applications in R during class. Students are strongly encouraged to follow along during class and review/run through these examples after class. Students will be provided with data, but may also use their own datasets.

Grading Scale

Students will demonstrate their mastery of the course materials by completing two mini-projects (each making up 20% of the final grade) and a final project (40%). The remaining 20% will come from participation. Late assignments are penalized 10% per day. Students who are experiencing extenuating circumstances that may prevent them from completing an assignment should contact the instructor as soon as possible. The final grade will be calculated using the following grading scheme.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Minimum Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>≥ 90</td>
</tr>
<tr>
<td>A</td>
<td>≥ 85</td>
</tr>
<tr>
<td>A-</td>
<td>≥ 80</td>
</tr>
<tr>
<td>B+</td>
<td>≥ 77</td>
</tr>
<tr>
<td>B</td>
<td>≥ 73</td>
</tr>
<tr>
<td>B-</td>
<td>≥ 70</td>
</tr>
<tr>
<td>C+</td>
<td>≥ 67</td>
</tr>
<tr>
<td>C</td>
<td>≥ 63</td>
</tr>
<tr>
<td>C-</td>
<td>≥ 60</td>
</tr>
<tr>
<td>D+</td>
<td>≥ 57</td>
</tr>
<tr>
<td>D</td>
<td>≥ 53</td>
</tr>
<tr>
<td>D-</td>
<td>≥ 50</td>
</tr>
<tr>
<td>F</td>
<td>&lt; 50</td>
</tr>
</tbody>

Course Policies

*Student Responsibilities in the Learning Process:* Students are expected to complete any assigned readings prior to completing that topic’s assessment. Students are also expected to complete all assessments on time. This means accessing the materials with sufficient time to complete assessments prior to deadlines. In the event that a student has questions concerning the material, they should formulate specific questions to ask the professor via office hours or email with sufficient time for a response prior to assessment deadlines (i.e. emailed questions should be sent at least 24 hours prior to a deadline, excluding weekends).
**Classroom Conduct:** Students are expected to participate in class in a thoughtful and respectful manner while in the pursuit of knowledge accumulation. Generally, this means engaging with one another’s ideas and treating others as you would like to be treated as well as *not* treating others how you would *not* like to be treated. Please see university policies on freedom of speech ([https://governingcouncil.utoronto.ca/secretariat/policies/freedom-speech-statement-may-28-1992](https://governingcouncil.utoronto.ca/secretariat/policies/freedom-speech-statement-may-28-1992)) and discrimination and harassment ([https://governingcouncil.utoronto.ca/secretariat/policies/harassment-statement-prohibited-discrimination-and-discriminatory-harassment](https://governingcouncil.utoronto.ca/secretariat/policies/harassment-statement-prohibited-discrimination-and-discriminatory-harassment)).

**Accommodations:** Please discuss any special needs with the instructor start of the semester, for example, to request reasonable accommodations if an academic requirement conflicts with your religious practices and/or observances. Those seeking accommodations based on disabilities should complete the appropriate documentation with Student Life Programs and Services ([https://studentlife.utoronto.ca/department/accessibility-services/](https://studentlife.utoronto.ca/department/accessibility-services/)).

**Academic Misconduct:** All acts of dishonesty in any work constitute academic misconduct. The Student Disciplinary Regulations ([https://governingcouncil.utoronto.ca/secretariat/policies/code-behaviour-academic-matters-july-1-2019](https://governingcouncil.utoronto.ca/secretariat/policies/code-behaviour-academic-matters-july-1-2019)) will be followed in the event of academic misconduct.

A special note on plagiarism: plagiarism is the act of representing directly or indirectly another person’s work as your own. It can involve presenting someone’s speech, wholly or partially, as your; quoting without acknowledging the true source of the quoted material; copying and handing in another person’s work with your name on it; and similar infractions. Even indirect quotations, paraphrasing, etc., can be considered plagiarism unless sources are properly cited.

**Copyright:** Course materials, including recorded lectures and slides, are the instructor’s intellectual property covered by the Copyright Act, RSC 1985, c C-42. Course materials posted on Quercus or the class website may not be posted to other websites or media without the express permission of the instructor. Unauthorized reproduction, copying, or use of online recordings will constitute copyright infringement.
Course Schedule

Week 1: Introduction to Causality

Week 2: Introduction to R and Rstudio, Experiments

- Timothy D Wilson, Elliot Aronson, and Kevin Carlsmith. The art of laboratory experimentation. 2010.

Week 3: Text Analysis

Week 4: Web-scraping

- Mini-Project 1 is due on Friday, October 8, at 5 pm.

Week 5: Big Data

Week 6: Networks I: Theory

- Apply for a Twitter developer account: [https://developer.twitter.com/en](https://developer.twitter.com/en). Click “Apply” in the top right corner and fill out the information to the best of your ability.
Week 7: Networks II: Social Media Applications

- Mini-Project 2 is due on Friday, November 5, at 5 pm.

Week 8: Spatial Analysis I: Maps

Week 9: Spatial Analysis II: Modeling Spatial Dependence

Week 10: Analysis of Temporal Data

Week 11: Instrumental Variables

- Final Project is due on December 8 at 5 pm.
